

**DRIVERS' VISION TEST**

**Study Shows Need For Better Exams**

A new eye test for drivers based on examinations of 17,500 California motorists over the past five years, has been recommended by experts at the University of California at Los Angeles.

It would check the drivers' ability to size up a moving object, in contrast to the usual static eye chart exam-

ination for license applicants. The new test for "dynamic visual acuity" (DVA) was developed by a UCLA research psychologist as part of the most thorough study ever undertaken to relate vision to driving performance.

"WE DEVELOPED the concept of DVA from the fairly simple premise that a man in a car is usually moving while looking at moving objects," said Dr. Albert Burg of the Institute of Transportation and Traffic Engineering at UCLA.

"We felt, therefore, that dynamic visual acuity might be more closely related to driving performance than any other kind of eye test."

To check this out, Dr. Burg and his co-workers developed a DVA test in which applicants for driver's licenses

were asked to identify rapidly moving targets on the screen. THREE TEST units, including one in a trailer, visited 46 offices of the California Department of Motor Vehicles over a three-year period. The 17,500 volunteers, ranging from 16 to 92 years, took the DVA and other visual tests.

Results were sent to Department of Motor Vehicles headquarters in Sacramento and checked against driving records over the previous three years. Records of the California Highway Patrol and insurance companies were also checked.

After a thorough analysis, Dr. Burg recommended reliable, compact and inexpensive DVA testing machines and tests instead of, or in addition to, the usual eye chart tests for all applicants

**Lifeguard To Direct Surf Event**

Holding the post of general chairman of the fifth International Surf Festival is Captain Dwight Crum of the Los Angeles County Lifeguard Service. The event, one of the largest of its type in the Nation will take place July 27 through 30 under sponsorship of the cities and chambers of commerce of Hermosa Beach, Manhattan Beach, and Redondo Beach.

Crum, 44, is a native of Los Angeles and a graduate of Compton High School and the University of Southern California, where he received a bachelor's degree in 1943 in industrial management.

He served as a lieutenant with the United States Navy in the South Pacific and Philippines Theaters.

A famed swimmer and water polo player, Crum was Pacific Coast Conference 440-yard swimming champion while attending USC.

A 15-year resident of Redondo Beach, Crum and his wife Virginia, reside at 417 Avenue E with Gary, 18-year-old El Camino student, and Debbie, 15, a student at Redondo Union High School.

**Grand Jury Foreman Chairs Testimonial**

Lynne A. Frantz will act as master of ceremonies for the I. H. Hawkins Testimonial Banquet, it was announced today by James Scoufos, president of the sponsoring Redondo Beach Chamber of Commerce.

Frantz, 37, is currently serving as foreman of the Los Angeles County Grand Jury—reportedly the youngest in its history to hold that position.

Born Feb. 17, 1930, in Fort Dodge, Iowa, Frantz is a graduate of Washington High School of Los Angeles and El Camino College.

A past president of both the Redondo Beach Chamber of Commerce and Redondo Beach Jaycees, Frantz was

named "Young Man of the Year" for 1962 and "Man of the Year" in 1965. The recipient of the first "Golden Apple Award" by the Redondo Beach City Teachers Association, he was charter president of the South Bay Kiwanis Club and is a past chairman of the board of managers of the South Bay YMCA. He is active in numerous professional, civic, fraternal, philanthropic and religious organizations.

Employed as promotion manager of South Bay Center, he has won two national and 15 regional advertising awards.

Reservations for the banquet are available at the Chamber office, 555 Harbor Drive.

**Dorothy Digs**

The three most often encountered "nuisance" fungus diseases which pester rose gardeners are Powdery Mildew, Orange Rust and Black Spot. The key condition which permits any or all of these diseases to occur is relatively high humidity.

This must be present before Fungus can even get started. Mildew and Black Spot need humidity, but are easily controlled with our definite changes in climate.

Orange Rust is easily recognized by orange spots which occur on the underside of the Rose leaflet. It is an endemic, spore borne disease which occurs most always along the dew areas. Orange Rust must have actual water droplets on the leaflets since this is a positive condition necessary for the spores to sprout.

SPRAYS USED in control of the above fungus diseases include those which contain lime-sulphur-oil emulsions, copper compounds, copper-chrome-zinc complexes and the newer systemic sprays, which are combinations of insects and a fungicide such as Karathane. While these latter sprays are less rapid in action, they last longer, are more easily applied and are more effective. Dusts similarly compounded are also available, but are somewhat objectionable as they result in more unsightly appearance.

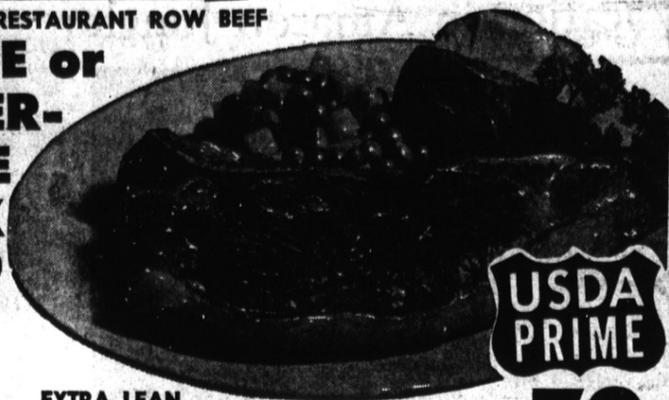

Orange Rust almost always occurs on the underside of the leaflet therefore it is extremely important to spray in such a manner that the underside of the leaflet is covered. This also applies to dusting techniques.

Among the projects especially suitable for city and suburban 4-H'ers are automotive, safety, health, home economics, dog care and training, community beautification and photography.

Joe wonders if food is one of his best buys. He knows too well that the cost of feeding his family has gone up the past few years. But so has everything else. The cleaning bill. The addition to his house. The price of his new car. But Joe forgets that his wages have gone up too. If he looked at his food bills in terms of hours worked, he'd find out that he's better off today. Six years ago, Joe worked eight hours out of a forty hour week to feed his family. This year he worked seven hours and 12 minutes to buy the same food items. Think about it Joe! Food is still one of your best buys.
